Dr. Joshua Lederberg,
Associate Professor of Genetics
The University of Wisconsin
College of Agriculture
Department of Genetics
Madison 6, Wisconsin

Dear Dr. Lederberg:

Enclosed are copies of several reprints on *Paramecium*
bursaria and the one you requested.

I do not know of any recent work on these algal symbionts.
Dr. E. G. Pringsheim may still have a culture in the Botany
School collection at Cambridge, England. I do not believe
anyone in this country has it.

Sincerely yours,

John B. Loefer, Chairman
Division of Cellular
Physiology and Oncology
